# Giko Cat

## What is \$GIKO?

Giko is a community driven token based on Loop Network (LRC20).

## The origin of GIKO.

In 1998, a pixelated feline named Giko emerged from the digital underbelly of 2chan, a Japanese online forum, forever etching its mark on internet history. Giko, often depicted as a black cat with wide, surprised eyes and a single pixelated tooth, quickly became **the first widely recognized cat meme on the internet**. Its playful expression and simple charm resonated with early internet users, solidifying its place in internet history.

Now, with the rise of memecoins onchain, we're proud to bring Giko Cat's legacy onchain, breathing new life into this cherished internet icon and offering a unique opportunity for the community to own a piece of this digital cultural gem.
